International Strategic Workshop

TOOLS TO IDENTIFY AND CHARACTERIZE IMPLANTABLE DEVICES: THE PERSPECTIVE OF THE RIAP-NJR COLLABORATION 1st March 2018

The Italian System of Medical Devices and the Database of the Ministry of Health (BD/RDM)

Elisabetta Stella
Direzione Generale dei dispositivi medici e del servizio farmaceutico

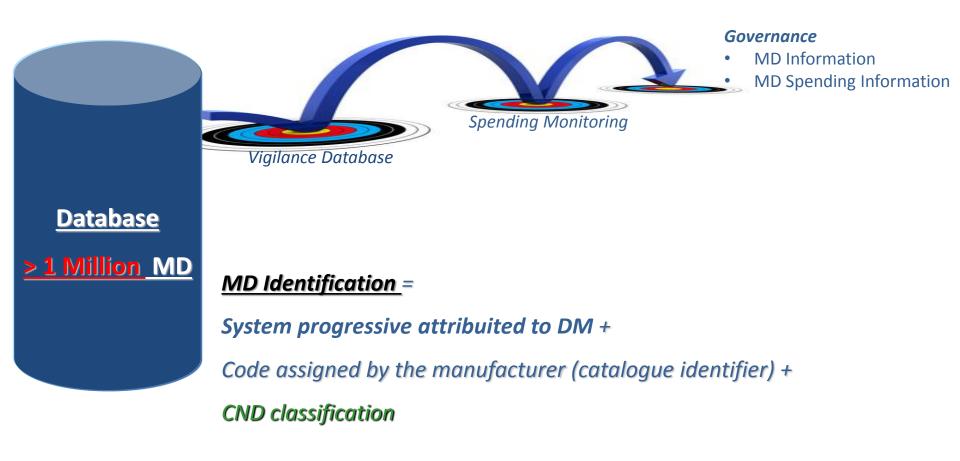

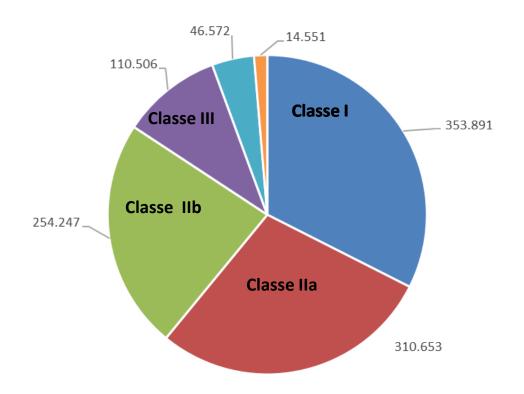

Italian Medical Devices Database

The MD Database contains information about Medical Devices marketed in Italy

1.090.420 Medical Devices registered in the Italian Database at 27.02.2018

Market Surveillance

MD Database

Governance Tools: National Classification of Medical Devices (CND) classification in homogeneous categories of products intended to perform a similar diagnostic or therapeutic intervention

MD Database

MD Market governance

CND

classification of similar types of DM

The first step towards the MD Database

The National Classification of Medical Devices (CND) is the first step towards the database of medical devices.

Why an Italian classification?

Other classification systems in use, they do not allow to cluster devices into uniform categories of products, i.e. categories of devices intended to perform a similar diagnostic or therapeutic intervention.

CND: the legal basis and the aim

The 2003 Fiscal Law (Law 266/2002) established:

- the creation of the medical devices database
- that medical devices should be classified in uniform classes and subclasses

Now the CND is a tool used in

- vigilance and market surveillance
- the assessment of procurements at each level of NHS
- analysis and definition of economic planning policies

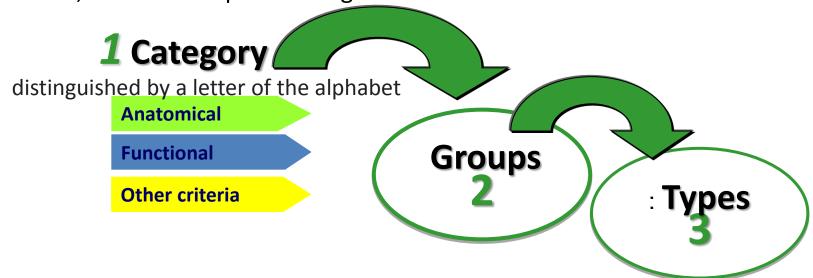

CND: the hierarchical structure

The first hierarchical level of the CND is defined "category".

There are 21 anatomical/functional categories, each identified by a letter of the alphabet.

Each category includes devices used for the same specific apparatus, anatomical district or organ or as a replacement of them (anatomical categories), or devices characterised by a similar use, intended use or clinical method (functional categories). In addition, there are 4 special categories.

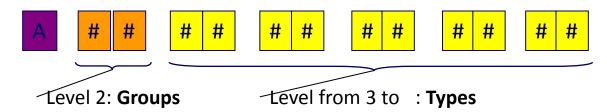

The classification structure is a 7 levels hierarchical tree

Each level is identified by:

an alphanumeric code (max 13 digits)

Level 1: Categories

a description

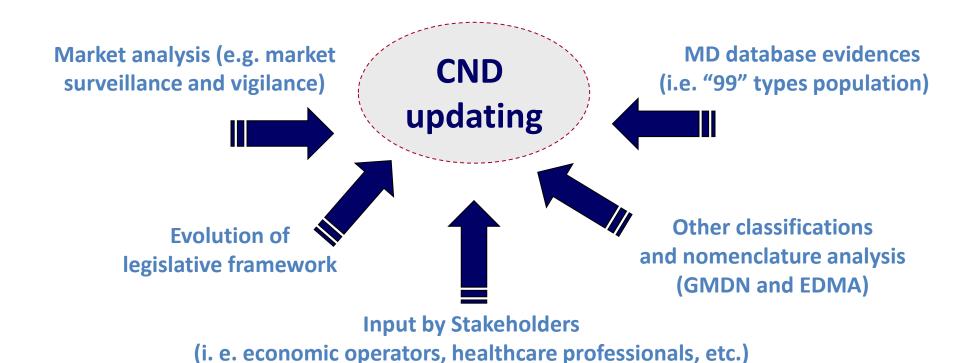

Criteria DEVICES FOR ADMINISTRATION, COLLECTING AND PICKING Α **Anatomical** HEMATOLOGY AND HEMOTRANSFUSION DEVICES В **Functional** C CARDIOCIRCULATORY DEVICES DISINFECTANTS, ANTISEPTICS AND PROTEOLYTICS FOR MEDICAL DEVICES (D. Lgs. 46/97) D Other criteria **DYALISIS DEVICES GASTROINTESTINAL DEVICES** G н **SUTURE DEVICES ACTIVE-IMPLANTABLE DEVICES** J K **ENDOTHERAPY AND ELECTROSURGICAL DEVICES** L **REUSABLE SURGICAL INSTRUMENTS** M DEVICES FOR GENERIC AND SPECIALISTIC MEDICATION N **DEVICES FOR NERVOUS AND MEDULLAR SYSTEMS** Р IMPLANTABLE PROSTHETIC DEVICES AND OSTEOSYNTHESIS DEVICES Q DENTAL, OPHTALMOLOGIC AND ENT DEVICES R **RESPIRATORY AND ANAESTHESIA DEVICES** S STERILIZATION DEVICES Т PROTECTION DEVICES AND INCONTINENCE AIDS (D. Lgs. 46/97) U MEDICAL DEVICES, UROGENITAL APPARATUS ٧ **MEDICAL DEVICES - VARIOUS** W IN VITRO DIAGNOSTIC DEVICES (D. Number of Medical Devices per CND

The 83% of Medical Devices in BD/RDM is classified by 9 category of MD Italian Classification PROSTHESIS CATEGORY - (24%)

The linkage between CND and international nomenclature - GMDN

All "preferred terms" of GMDN, used by the manufacturers for device identification in the registration process, are entered in the database and linked to the CND.

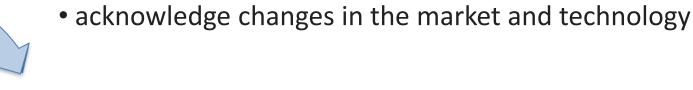

The "preferred terms" available in 2005 have been linked to CND codes.

New "preferred terms" are continuously entered and linked to CND on the basis of the requests of manufactures in the registration process.
